

Installation Instructions - Flat Head  
**Stainless Steel  
 Wood Screws**

- 316 Grade Stainless Steel for superior interior/exterior corrosion resistance.
- Marine Grade Stainless Steel with high tensile, torque, and shear strength.
- Ultimate screw for corrosion protection and treated materials (ACQ) in coastal and high moisture areas.
- Measure the wood to ensure the threading extends completely past the first board, allowing them to pull together tightly. **(See Diagram)**
- The knurl (if present) and shank of the screw may extend into the second board, but no threads should remain in the first piece.
